*“Sires of significance”  
 ...come from cows of significance*

Having trouble drawing a parallel between your system and your seed stock supplier?

The EPD and popularity chase has resulted in bulls transmitting bad feet, bad udders, poor fertility and the inability to fit commercial cattleman’s needs - and the trend isn’t changing!

*For over 25 years, we’ve been selecting our cattle for traits of economic importance. Genetics designed to increase profitability by functioning with less input.*

**Don’t feel limited in your genetic needs.**

*Online*  
**2 Yr Old**  
**March 18, 19 & 20, 2020**
